Poverty affects everyone in our community. What can you do to help?

If your business, church, agency or organization works with people from poverty, only a deeper understanding of their challenges and strengths will help you build relationship and partner with them to create opportunities for success.

Bridges out of Poverty training takes a comprehensive approach to understanding the dynamic that cause and maintain poverty. The focus of the Bridges training is to provide a broad overview of concepts as well as concrete, practical tools and strategies for improving outcomes for people living in poverty.

Participants will learn:

- how economic class and their hidden rules affect behaviors and mindsets
- review 4 areas of poverty research, providing a better understanding of the causes of poverty
- the theory of change
- what key resources, besides financial, help move a person out of poverty if they choose
- how to engage the unique strength of people in poverty
- importance of language and communication skills
